Colours

Powder Coating is factory applied using specialised electrostatic equipment and then cured by oven baking to form a tough and extremely durable finish.

Our standard colours are shown below but we can offer a large range at additional cost

Our Standard Range

Powder Coating can be effected by a number of natural phenomenon such as ultra violet light, atmospheric conditions and pollution. In order to keep your paint in the best possible condition we advise washing it regularly just like your vehicle.

Handles and Locks

Handles are available in Satin Chrome and Polished Brass.

A fully welded double lock box and double cylinder dead bolt lock ensure the maximum protection for your residence or business.

If you have a specific handle or lock already, we can customise the door to suit.

Our Security Doors, Window Grilles and Gates Feature

- Our products are made from high quality BHP steel
- We use a 31.8 x 31.8mm thick steel door and frame
- Solid steel bars are 12 x 12mm both circular and square shaped
- Locks and handles are satin chrome or polished brass
- All doors are supported by their own steel frame
- We use tamper proof fully welded hinges
- We supply a jimmy proof plate welded to the door from top to bottom
- All work is fully hot dipped galvanized to prevent corrosion
- We powder coat (paint) to a colour of your choice

Optional Items

- Locks can be fitted to use your existing key
- Fly screens and one way vision mesh
- Weather strip to the bottom of your door
